Specimens collected under a scientific collecting permit must be released or deposited with a public scientific or educational institution upon completion of the study, unless you hold a special purpose permit authorizing possession for a longer period. You should be as specific as possible in your responses to the questions below. Your application will be reviewed by a Biological Review Team prior to issuance, renewal, or amendment of a permit. We strongly recommend that you submit your application at least 60 days prior to the date that you need your permit, as required by 50 CFR 13.11(c). Please make sure you attach a copy of any pertinent State permits, as requested on page 1 of this application.

Please provide the following information on a separate sheet of paper:

1. A description of your proposed activity, including:

 - (c) If live-capture is proposed, the method of capture, and if applicable, where and for how long the birds will be maintained in captivity.

 - (e) Where birds will be released to the wild, including specific sites if known.
 - (f) If migratory game bird species will be collected, indicate whether it will be during hunting season for the species. If during the hunting season, indicate whether the proposed method of collecting is lawful under the applicable hunting regulations.

 - (h) The date you anticipate completing the collecting and holding of birds.
2. The purpose and justification for the proposed collecting, including an outline or study proposal for any research involved.
